Indoor Facility Profile

The Haven Indoor Golf & Bar

Located in Palos Heights, IL, we're a seasonal indoor golf facility with state-of-the-art simulators (Foresight GC Hawks), a full bar, and space that's perfect for leagues, private events, or just getting some swings in when the weather doesn't cooperate.

We run year-round leagues (Fall, Winter, Spring, and Summer), offer flexible memberships, and also host private outings ranging from birthday parties to corporate events.

Don Borschel, Owner - The Haven Indoor Golf & Bar
12317 South Harlem Ave, Palos Heights, IL. 60463

Why Indoor Golf is the Future: Simulators & Tech

Imagine it's raining, you've got an evening free, and instead of cancelling your practice, you step into a warm simulator bay, hit a few focused shots, watch the data, and finish with a practice plan.

That scene has now become normal in 2025. Indoor golf is expanding from just basements to clubs, homes, and shared entertainment spaces. And the reason is simple: the tech works in every condition, people like it, and it helps golfers get better *fast*.

And companies like [Golf VX](#) are showing what's possible when you blend simulators, training, and entertainment into one experience. Let's discuss what indoor golf actually is, why the tech matters, what research tells us,

and the real questions people are asking before they try or buy an indoor golf simulator.

Pepperdine Athletics Announces Partnership with SVN2 Indoor Golf Malibu, CA

The Pepperdine University Athletics Department and SVN2 Indoor Golf are proud to announce a new partnership, with SVN2 designated as an Official Sponsor of Pepperdine Athletics.

The partnership is highlighted by a season-long sponsorship of Pepperdine's Men's and Women's Golf programs, presented by SVN2 Golf. SVN2 will also collaborate with Pepperdine golfers through a Name, Image, and Likeness (NIL) activation, engaging selected golf student-athletes who will produce content and share their experiences throughout the academic year.

In addition, SVN2 Indoor Golf will receive visibility across Pepperdine Athletics through digital, in-venue, and broadcast platforms.

Platform Golf is Fixing the Flat in Simulator Golf

The sentiment, up to this point, is that simulator golf is OK if there's a foot of snow on the ground or it's too cold or too rainy and it's the only golf available. Fine, as far as it goes but it doesn't go far enough. Flat screen, flat lies and even if you can putt, it's always straight and only about 4 feet.

The innovators behind Platform Golf aren't flat-earthers in the universe of simulation. They have taken their original adjustable indoor putting green and married it with software that allows a simulator to communicate with the platform to mimic uneven fairway lies in real time. And it also creates putting with undulation from distances up to 40 feet.

It's not TGL-level simulation, which costs millions and takes an arena to house. However, Platform Golf has added a couple of dimensions of realism that could make simulator golf a much more attractive option when "real" golf isn't available — or for the growing number of indoor golf clubs that cater to the social aspect of the experience.

New Ideas

Golf Swing Systems Driving VR-Led Tech in Commercial Spaces

The leisure and [hospitality sectors](#) are experiencing substantial growth. Recent statistics suggest that the industry is expected to grow from \$58.84 billion this year to \$66.67 billion by 2030, at a Compound Annual Growth Rate (CAGR) of 2.53%.

The hospitality sector in the UK encompasses venues like hotels, restaurants, bars, pubs, catering services and more, contributing substantially to the UK economy and GDP. A central piece of this continued growth is the presence of innovative technology, ranging from virtual reality (VR) to artificial intelligence (AI), all shaping the modern customer experience. One of the most groundbreaking businesses at the epicentre of this type of tech revolution is [Golf Swing Systems](#), a business that's redefining corporate and indoor entertainment.

Known for their best-in-class golf simulators using renowned brands like TrackMan, Foresight, and Uneeko, Golf Swing Systems have become synonymous with modern golf training. Professional tour players and coaches espouse the wonders of their systems, to the point where domestic, purpose-built simulators have become more widely accessible thanks to Golf Swing Systems. They have since upped their offerings to include [commercial golf simulators](#), which can be a compelling investment proposition for forward-thinking leisure business owners.
